Must Clubs Meet at 5:00 p.m.?

It will be interesting to see the general attendance of the students required to be held at 5:00 p.m. It is not fair to ask a girl to hold such a long meeting, for the time is long enough for her to complete her work and have time to go to the night classes.

We are very much interested in the course of study pursued by our students. They are doing very well in their studies, and we hope they will continue to do so. The classes are well attended, and we hope they will continue to be.

Let's Weld Boarders—Day Students Relations

We have much to say about the difference between the morning and afternoon courses. We feel that the morning courses are more interesting and the afternoon courses are more dull. We think that the morning courses should be held in the morning and the afternoon courses should be held in the afternoon.

The students are very happy with the courses they are taking. They are doing very well, and we are very proud of them.

America's Favorite Cowboy Star Interviewed by Fontbonne Fan

By NIKI KINSTON

"How would you like to ride Trigger and interview Roy Rogers?" the manager of Fontbonne College asked. "I'd love to," I replied.

"How do you feel about it?" he asked. "I feel great," I replied.

"I'll call you later," he said. I felt excited as I rode Trigger down the street.

Science Sidelights

An interesting subject in the science area is how to use a microscope. It is very important to know how to use a microscope, as it helps us to see things that we cannot see with our naked eyes. It is also important to know how to use a microscope to see the tiny particles that make up the world.

Questioning Mary

By NIKI KINSTON

"I want to see a movie tonight," I said.

"What movie?" she asked.

"I don't know," I replied.

"Well, do you have any idea?" she asked.

"I don't know," I replied.

"Well, I'll take you to the movie tonight," she said.

"Thank you," I replied.
